

West Virginia State Snapshot

Nationwide,
12.2%

of public school students received special education in 2013–2014.

In West Virginia,
14.4%

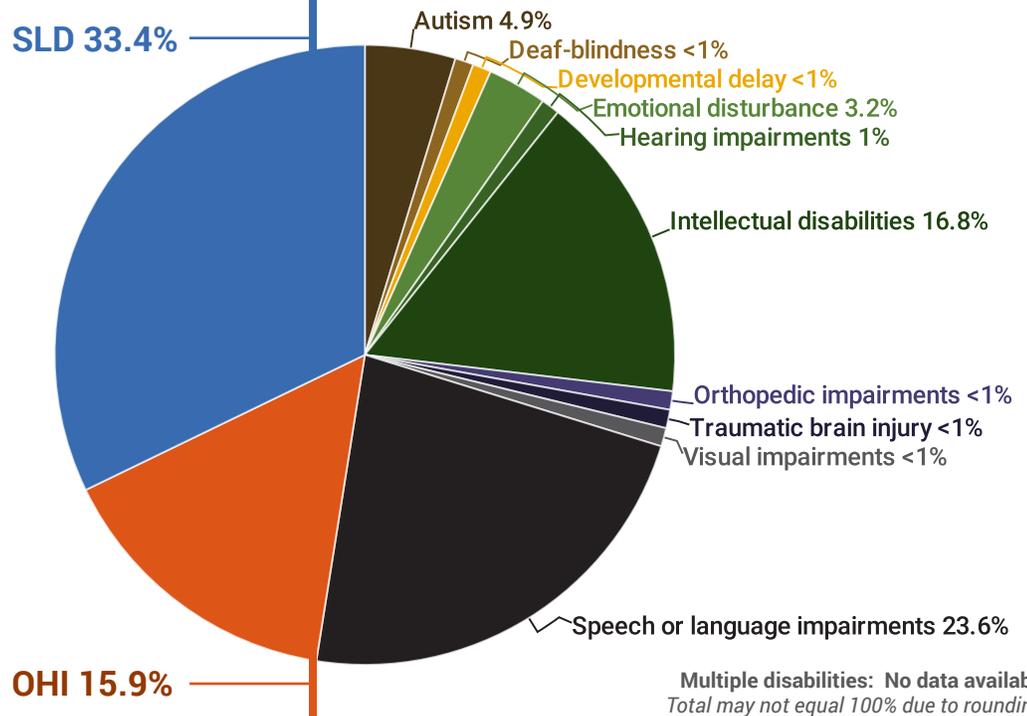

of public school students received special education that year.

Rates of SLD & OHI among students receiving special education in 2015–2016

13,448 children

were identified in 2015-2016 with **specific learning disabilities (SLD)** in West Virginia, where they accounted for the largest of the 13 disability categories covered under special education law.

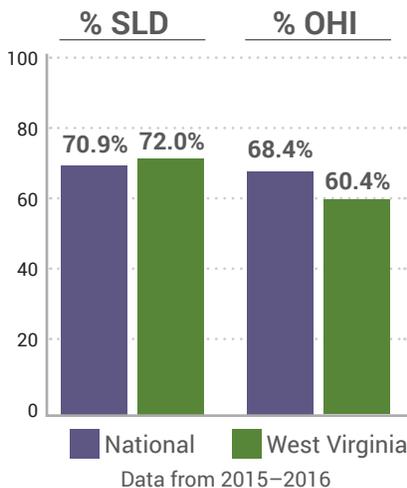

Children are often classified under the category of **other health impairments (OHI)** when ADHD is the primary reason they qualify for special education. OHI can cover other health conditions but is used here as a rough proxy for students receiving special education who have ADHD.

Educational Environment

As detailed in this chart, many students receiving special education spend 80% or more of the school day in general education classrooms. Inclusion can improve outcomes—if teachers have the skills needed to help diverse learners.

State Literacy Laws

West Virginia law requires students to be tested in reading in grades K–3 and all struggling students to receive intervention. Those who are not proficient may be retained in third grade.

West Virginia also has a law that defines dyslexia and other types of SLD and requires that students with SLD receive necessary screenings and early assessments.

Discipline

Nationwide, students with disabilities are more than twice as likely to be suspended as those without disabilities, and the loss of instructional time increases the risk of academic failure and school aversion.

In West Virginia students identified with SLD or OHI accounted for

59.9%

of students with disabilities who received out-of-school suspensions in 2014–2015

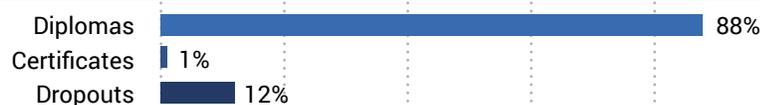

Leaving High School

Students with learning and attention issues are as smart as their peers and, with the right support, can achieve at high levels. But too often students with these issues leave school with a certificate of completion—instead of a regular diploma—or drop out altogether. Here’s a look at outcomes for students receiving special education in West Virginia, where **86.5%** of all students graduated in 2014–2015.
